<ul style="list-style-type: none">Optimized UI/UX using CSS Flexbox, CSS Grid, and React-Bootstrap for a visually appealing and responsive design, enhancing user experience across all devices.Enhanced website accessibility by ensuring WCAG compliance and implementing semantic HTML for better SEO and screen reader compatibility.Utilized Git and GitHub for version control, collaborating with senior developers on code management and project updates.	

PROJECTS

Personal Portfolio | [Try it here.](#)

Developed a Personal Portfolio website using HTML, CSS and JavaScript, achieving a 70% improvement in flexbox and 30% improvement in overall UI/UX.

- A Personal portfolio website where all my details are, my education, my skills and my social accounts too.
- It is responsive and implemented dark mode in it.

Text-Utils | [Source Code.](#)

Developed a Text-Utils web app using react, Bootstrap, achieving a 70% improvement in state management efficiency and a 30% enhancement in overall user experience.

- A simple web-app where we can edit our plain text.
- Allow to paste text and easily switch between different cases (uppercase, lowercase) also remove extra spaces.
- Can see the text summary where will know how many words have typed and how many characters are there in it.

CERTIFICATION

- Completed a job simulation where I built a web application using React as a front-end engineer at Skyscanner. [Certificate](#)
- Completed a course on React.js, gaining proficiency in creating dynamic, responsive web applications. [Certificate](#)
- I have successfully completed the "JavaScript for Web Development" course offered by Great Learning in November 2024. [Certificate](#)
